2	<b>The DCC Proficiency tests</b> are carried out according to <b>EN ISO/IEC 17043</b> .
3	<b>Statistical evaluation:</b> Statistical evaluation of the data is done on the basis of methods of robust statistics ( <b>Hampel estimator, Q-method</b> , is defined in ISO/ TS 20612 (2007), DIN 38402-A45 (09-2013), DIN EN ISO/IEC 17043, ISO 5725 and DIN ISO 13528).
4	<b>Ranking for the lab-performance:</b> For the final assessment of the <b>laboratory performance</b> takes place a Zu-score calculation. With a result $ Zu  \leq 2,04$ the interlaboratory test is successful. Individual case decisions (Expert evaluation) reserve
5	<b>Anonymity / Confidentiality:</b> The interlaboratory tests are anonymous. Each laboratory gets an own changing labcode-number.
6	<b>Deadline for registration PT-Analytics:</b> registration until 30. April, (Please use order Email to <a href="mailto:order@dcc-germany.org">order@dcc-germany.org</a> )
7	<b>Sample distribution/shipping PT-Analytics:</b> The sample dispatch takes place from January to May.

Please don't change or close the filled Excel files. Additions are to be registered only in the lower part of the files.
10	<b>Tests investigation / Subcontract:</b> Only the investigations are accomplished, which are usual in the participating laboratory. Subcontract assignment is to be marked.
11	<b>Test methods:</b> The test methods are specified in the Download <b>Excel-Files Table 1</b> . Abnormal test methods shall be indicated. Comparable CEN/EN ISO/ASTM-standards or identical national standards, instrumental methods and in-house method are allowed.
12	<b>Two single determinations</b> (double determination) must be made. If the difference between the individual results is larger than the repeatability in the appropriate standard method, a further double-test is accomplished. <b>The results of both double-tests have to be reported.</b>
13	<b>Storage:</b> The samples should be stored dry, cool and protected against damage of the foil/packing up to the examination.
14	<b>After opening</b> the gas-proof sample bags and/or sample containers the determination of total moisture is to be accomplished immediately.
