

DCC - Delta Coal Control GmbH **Industries Proficiency Testing Programme 2021**

We offer special proficiency testing programs for certain industries and registration for our industries proficiency tests is **possible all year round**. The following industries proficiency tests are currently available:

DCC 12 Industries proficiency test
DCC 13 Industries proficiency test
DCC 20 Industries proficiency test
DCC 22 Industries proficiency test
DCC 25 Industries proficiency test
DCC 26 Industries proficiency test

DCC 50 Industries proficiency test
DCC 80 Industries proficiency test

Calorimetry

Ash fusibility

UN N4 test for self-heating substances

TML for cargoes that can liquefy

Organic petrology

Charcoal, BBQ charcoal: test for unacceptable additives

Strength of blast furnace coke, MICUM, IRSID

Fire testing of building products ISO 1716

For registration, please use the Industries Proficiency Test Registration Forms provided in the "Downloads" section of our Website.

A minimum number of ten participants is required for the test objects for testing for **Strength of blast furnace coke, MICUM, IRSID, and TML for cargoes that can liquefy**. We will collect the registrations as they come in from the laboratories and will send out the samples as soon as the required minimum number of participants has been reached.

If you are planning individual international interlaboratory comparisons within your company, we will be pleased to organize and carry out such interlaboratory comparisons for you according to your wishes (test objects, parameters, methods, evaluations, assessments).

*The prices quoted are net (excluding VAT) and include the evaluation in the form of a PDF document (to be downloaded from a password-protected section of our website), a certificate, and participation in the DCC Meeting in Hamburg. Simultaneous interpreting service German/English will be provided for the meeting. As we are planning to hold the meeting as a "hybrid" event, participants will have the option of either attending in person on site in Hamburg or following the meeting in the form of a live webinar on the Internet.

*VAT will not be charged for participants from the EU and outside Germany **if the VAT number is stated in the registration**. Our proficiency tests are carried out in an anonymized manner.

The general terms and conditions of DCC GmbH apply.

By taking part in the proficiency test, the laboratory expressly accepts the Terms of Handling (document no. DCC_03_21).

The project leader for the proficiency tests is Dr. Georg Szczendzina.
